Bodyworks is a bundle of 3 sizes with a standard set of features and with a style which emphasises realism over statistical accuracy (limb lengths and the model height are anatomically correct)

HumanWorks models are sold individually, with a style which enables more complete compliance with more detailed data for each percentile (eg average girth of each body part).

Please choose which library which suits you better by looking at the different characteristics below:

Feature	BodyWorks	HumanWorks
Number of models per download	3	1
Style	muscular	smooth
Percentiles apply to	stature, reach, lengths	stature, reach, lengths, girth
Hideable handles	No	Yes
Pose adjustment	Standard	Enhanced
Compatible with SolidWorks	from 2000 version	2004 version
Adjustable clothing and footwear	No	Yes
PhotoWorks textures	No	Yes
Adjustable/removeable hairstyle	No	Yes
